EDDIE C. LISI: With due respect, Secretary and

5 Scientific and Environmental Protection Agency, for all
6 the hours and the study, the Yucca Mountain site is
7 likely to meet the standard for the safety and economic.
8 I do believe that the Secretary should process to
9 recommend the site to the President at this time.

10 I believe the President will approve the
11 license and I believe the United States should take care
12 of the license application. The Secretary and the large
13 body of the Scientific, the Federal Government, is
14 responsible for the waste, where to go and all that, and
15 we got Yucca Mountain, and that responsibility is in
16 common with the knowledge and the technology to inform
17 us of the facts.

18 We also have a responsibility to the future
19 generation. Technology is a good thing and also can be
20 a bad thing. I recommended to the Secretary the Yucca
21 Mountain site as primary site, with suitable evaluation
22 every five years. Eddie C. Lisi
